### High-tech next generation bio-solution for a sustainable future.

#### Käyttö

100 l of BioSISU is enough to nourish 1m<sup>3</sup> of soil.

BioSISU is used by mixing it with the soil. Different crops may need a different ratio of BioSISU.

Always make sure how much BioSISU you need by reeding the ingredients of the product.

### Why settle for just a fertilizer? when you can use Bioraiser and take care of your crop, land and enviroment at the same time

BioSISU so called water bank for sapling 10 liters of BioSISU restore 9 liters of water for the sapling + nitrogen when it biodegrades.

BioSISU do not eutrophicate water, stays in the absorbent in the ground.

Normally fertilizers dissolve in first watering and do not stay for the plants usage. BioSISU holds them where they are needed.

100% green ground coverage gained 1 month earlier with BioSISU.

20 & more harvest, depending on the planted crop.

Fertilizer savings 50-70%

Water savings 50-70%

Non-toxic, NCP tested, contains water, stays in the absorbent in the ground.

1000 l of BioSISU weight only about 70 kg.

Todistetut testitulokset Luonnonvarakeskus Luke.
